

## 5 SUMMER HORSE FENCE PRECAUTIONS

[www.rammfence.com](http://www.rammfence.com)

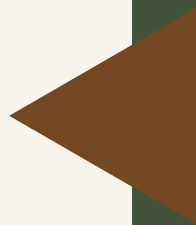

1

### WALK THE FENCE PERIMETER

This is a great way to spot any fence rails or hardware that may have sustained abuse or need maintenance.

If you see signs of wear and tear, be sure to put up an electric fence before safety issues begin to arise.

2

### CHECK CROSS FENCING

3

### CONGREGATION AREAS

When horses gather at high-traffic areas, such as gates at feeding time, are they safe?

Are there any areas continuously getting muddy from water or worn down from footing?

4

### MUD MANAGEMENT

5

### GATE SECURITY

Be sure to check that your gate latches are working properly so horses don't get loose.
